CONTENTS

No. 1 (January, 1937)

Original Articles: PAGE

146. The heat denaturation of albumin and globulin in milk. II. Denaturation and degradation of protein at temperatures of 75–120° C. S. J. Rowland 1

147. The soluble protein fraction of milk. S. J. Rowland . 6

148. Diacetyl in cold-stored butters. II. C. R. Barnicoat . 15

149. The coagulation of milk with rennet. Some experiments with slow-renneting and soft-curd milks. F. H. McDowall, R. M. Dolby and A. K. R. McDowell 31

150. The effect of certain metallic contaminants on the Cheddar cheese-making process. C. R. Barnicoat 53

151. The reactions and properties of annatto as a cheese colour, with particular reference to the chemistry of cheese discoloration. C. R. Barnicoat 61

152. Studies on the chemistry of Cheddar cheese making. V. Factors influencing the acidity and mineral content of cheese. R. M. Dolby, F. H. McDowall and A. K. R. McDowell 74

153. Studies on the chemistry of Cheddar cheese making. VI. Factors affecting the relation between lactic acid and titratable acidity in wheys. R. M. Dolby, F. H. McDowall and A. K. R. McDowell 86

154. Studies in Cheddar cheese. V. The effect of chemical substances on the ripening process. W. L. Davies, J. G. Davis, D. V. Dearden and A. T. R. Mattick 92

Biennial Reviews of the Progress of Dairy Science:

Section A. Physiology of dairy cattle.

I. Reproduction and lactation. J. A. B. Smith . . 105

II. Nutrition. S. Morris 119

III. Genetics. A. D. Buchanan Smith 131

No. 2 (June, 1937)

Original Articles: PAGE

155. The composition of mare's milk. II. The variation in composition during lactation. III. The influence of intra-mammary pressure on the composition of milk with special reference to the mare and cow. R. G. Linton . 143

156. The composition of milk and whey, with special reference to the partition of calcium and phosphorus. E. R. Ling . 173

157. The creaming power of heated milk. The relationship between the denaturation of albumin and globulin and the reduction in creaming power. S. J. Rowland . . 195

158. The nutritive value of raw and pasteurized milk for mice. G. S. Wilson and I. Maier 203

159. The resistance to infection with *Bact. typhi-murium* of mice fed on raw and pasteurized milk. G. S. Wilson . 218

160. Lactic acid bacteria in relation to cheese flavour. I. I. R. Sherwood 224

161. Studies in Cheddar cheese. VI. The degradation of milk proteins by lactic acid bacteria isolated from cheese, alone, with sterile rennet and with whole rennet. J. G. Davis, W. L. Davies and A. T. R. Mattick . . . 238

162. The rheology of cheese, butter and other milk products. (The measurement of "body" and "texture".) J. G. Davis 245

Biennial Reviews of the Progress of Dairy Science:

Section F. Milk-borne diseases. W. M. Scott 265

No. 3 (October, 1937)

Original Articles:

163. A new method for the determination of butterfat in dairy products. J. Golding 275

164. The nutritive value of milk supplemented with minerals as an exclusive diet for rats. Comparison of equal volumes of summer and "winter" milk before and after laboratory pasteurization. K. M. Henry, E. W. Ikin and S. K. Kon 282

PAGE

165. The statistical treatment of experiments involving equalized feeding. The problem of appetite. P. WHITE . . 307

166. The relative values of raw and pasteurized milk in the feeding of calves. J. WILKIE, S. J. EDWARDS, A. B. FOWLER and N. C. WRIGHT 311

167. Discoloration and corrosion in canned cream. Part II. C. J. JACKSON, G. R. HOWAT and T. P. HOAR . . 324

168. Bitterness and thinning in canned cream. A. A. NICHOLS, G. R. HOWAT and C. J. JACKSON 331

169. A statistical inquiry into the inheritance of milk yield in three herds of dairy Shorthorn cattle. A. D. BUCHANAN SMITH 347

Biennial Reviews of the Progress of Dairy Science:

Section B. Bacteriology and Mycology applied to dairying. A. T. R. MATTICK, E. R. HISCOX and J. G. DAVIS . . 369
